Word by the President & Secretary General of ELRA

Many strategic activities will be carried out in 2020 and 2021 by the ELRA Team (Board and staff). The highlights are as follows:

- **Work on LRs and enrichment of the ELRA Catalogue**
  ELRA will continue its work to enrich its LRs catalogue incl. the Universal catalogue. ELRA is trusted to clear all IPR issues before making resources available and we will continue on that path. A number of resources will be jointly distributed with ELRC and ELG but also with other international players. ISLRN allocation will also continue, in collaboration with our partners.

- **Participation in major LR-related initiatives in Europe**
  ELRA, through its agency ELDA, will continue to be actively involved in major LR and LT-related initiatives in Europe such as ELRC, ELG or the more recent ELE and bring its expertise in LRs management and relating legal issues.

- **Participation in LRs Production projects**
  ELRA will continue to manage a number of production projects to support the development of LT/AI solutions, including building corpora for less-resourced language and hate speech detection in social media.

- **LRE Map**
  A major scientific contribution of ELRA associating publications and resources will be continued to cover the recent events. A new version of the LRE Map software has been released.

- **Next LREC edition is LREC 2022 in Marseille**
  After the cancellation of LREC in 2020 due to the COVID-19, the next edition is reconvened in Marseille in 2022.

- **Support to SIGs and LT4All**
  After LT4All held in Paris late 2019, work of the Less-resourced Languages Committee has continued with SIGUL. A new SIG on Spoken Language Translation has been setup in partnership with ACL and ISCA.

“We continue to vision 2020-2025 with emphasis on a renovation of ELRA policy and activities.

ELRA will continue to increase its visibility by forging new partnerships and strengthening current collaborations with CLARIN (for licences and distribution) or, UNESCO (LT4All and less-resources languages).

Renovation of ELRA such as the LRE Map will continue including the ELRA Catalogue, the Data Management Plan or the License Wizard.

Antonio Branco, President of ELRA
Khalid Choukri, Secretary General
EUROPEAN LANGUAGE RESOURCES ASSOCIATION

ELRA AND ITS AGENCY, ELDA

Founded in 1995, ELRA is a non-profit organization whose main mission is to make Language Resources (LRs) for Human Language Technologies (HLT) available to the community at large. To achieve this goal, ELRA carries out a wide variety of activities, including Identification & Distribution of LRs, Production & Validation of LRs, Technology Evaluation, Information Dissemination on HLT.

WHEN AND HOW DID IT START?

The history of ELRA starts in the late 1980s. Back then, the European Commission and some national agencies had encouraged and funded Language Engineering Research and Technology projects for nearly a decade but the Language Resources developed for/within these projects were either lost or very difficult to re-use. The Research community and their sponsors therefore decided to act on this issue and ELRA was created in March 1995, with the mission of providing a central clearing house for Language Resources.

ELDA, THE OPERATIONAL BODY OF ELRA

ELDA, the Evaluations and Language resources Distribution Agency is ELRA’s operational body. It is responsible for the development and execution of ELRA’s strategy. Daily operations are supervised by its Managing Director, who reports to the ELRA Board. The activities cover the practical and legal concerns related to the distribution of resources, including legal advice provided to ELRA members and suppliers, the management of user and distribution agreements on behalf of ELRA. ELDA is also actively involved in production, evaluation and dissemination activities.

THE ELRA BOARD

ELRA’s management is entrusted to a Board which consists of 9 elected members, including a member representing the individual members, who reflect the various dimensions of the Language Resources and Evaluation field. Each Board member is elected on a 2 year-term by an open vote of the ELRA members at the General Assembly.

http://www.elra.info/en/about/elra/elra-board/

THE ELRA MEMBERS

ELRA members include 40+ institutions (academic groups and research laboratories) and companies (industrial and commercial organisations) from all over the world (nearly all the countries of the European Union are represented) and 350+ individual (researchers, users of LRs, etc.) These institutions and companies belong to sectors like telecommunication, marketing, multilingual business, and deal with Human Language Technologies (HLT), especially speech, text and terminology.

WHAT IS A LANGUAGE RESOURCE?

The term Language Resources refers to sets of language data and descriptions in machine readable form, used in many types of areas, components, systems, applications, including the creation and evaluation of natural language, speech and multimodal algorithms and systems, the software localisation and language services, the language-enabled information and communication services or the knowledge management; e-commerce, e-publishing, e-learning, e-government.

The distribution of resources, which cover a wide variety of languages and belong to different modalities, is shown below:

DISTRIBUTION

As part of its distribution activities, ELRA has developed a Licensing Model in order to simplify the relationships between the producers/providers of Language Resources and the users. All agreements have been drafted with the support of lawyers.

To distribute a large range of resources and make them visible worldwide, ELRA has set up the ELRA Catalogue, a dynamic website, allowing the browsing and retrieval of detailed information on Language Resources.

Throughout the years, ELRA has developed an extended metadata set for the description of Language Resources. In the framework of its collaborative work, the ELRA Catalogue has been exported into OLAC and META-SHARE standards by means of associating the ELRA metadata for describing LRs with the OLAC and METASHARE metadata.

OLAC: http://www.language-archives.org
META-SHARE: http://www.meta-share.eu
The Language Resources collected by ELRA are made available to the public through the ELRA Catalogue that can be accessed online at: [http://catalogue.elra.info](http://catalogue.elra.info)

The evolution of the LR types in the ELRA Catalogue is shown below.

Charts below provides an overview of the LRs distributed in 2020.

As of end 2020, 1478 Language Resources are available in the ELRA catalogue of LRs.
The Universal Catalogue is an important identification feature. Information regarding Language Resources (LRs) identified all over the world are gathered in this publicly available repository. The LRs are generally located by the ELRA team, but external feedback from our members, collaborators, and web-site visitors is also included. Our aim is to provide researchers and developers information about existing LRs and spare them the effort of searching or rebuilding similar resources. The Universal Catalogue collaborative: through a simple form, anyone can add some basic information, point to an existing language resource or enrich the current description of a LR already present in the Universal Catalogue.

The initiative for LR & Tools identification

Initiated by ELRA and FlareNet at LREC 2010, the LRE Map is a mechanism intended to monitor the use and creation of language resources by collecting information on both existing and newly-created resources during the submission process. The feature has been so successful that it has been implemented also at other major conferences including COLING, IJCNLP, Interspeech, LTC, ACLHT, O-COCOSDA, RANLP, in addition to the LRE Journal. The LRE Map feature is now part of the LREC standard submission processes for both the main conference and all the workshops. Globally, 6143 LR resource type forms have been filled since 2010.

Production, A Long-Term Expertise

Over the past 24 years, ELRA has compiled Language Resources (annotated corpora, corpora for MT evaluation, spoken LRs, etc.) in 30+ languages. This could be achieved thanks to the large network of partners worldwide that ELRA has built overtime.

ELRA remains involved at every stage of the Language Resources production.

ELRA has produced Language Resources for over 30 technologies which include:

- Automatic Speech Recognition
- Monolingual textual Corpora
- Broadcast News Transcription
- Aligned Corpora for Machine Translation
- Spoken Language Translation
- Multilingual Named Entities Corpora
- Spoken Language Understanding
- Syntactic & Semantic annotations

Language Resources can be produced in the framework of a contract with individual organizations or may be created within EU-funded projects, national projects or International cooperation projects, and may eventually become available in the ELRA catalogue.
The **International Standard Language Resource Number** (ISLRN) is a universal identification schema that provides a unique identifier using a standardized nomenclature. Each Language Resource (LR) with an ISLRN can therefore be recognized with its proper reference.

**LREC 2022** endorses the need to uniquely identify LRs through the use of ISLRN. The assignment of ISLRNs to LRs cited in LREC papers will be offered at submission time.
ELRA MEMBERS

Membership

ELRA membership scheme is two-fold: institution-based and individual-based. Any organisation, public or private, European or non-European, can join. However, full membership, with voting rights, is available only to organisations legally established in Europe, as per the article 5 of the Statutes. As of January 2018, the membership scheme is changing to welcome individual members. The first subscription was offered to all LREC 2018 participants as part of their registration fees. In 2020, the LREC participants could join for a fee: 383 joined ELRA and 4 joined directly.

2020 ELRA Membership at a glance

- **Price discounts** on the resources, up to 70% reduction on some items, including the resources produced by ELRA.
- **Discounted fees** for members registering to the biennial conference LREC.
- 30% discount on the membership fees by renewing their membership for 3 consecutive years or more.
- **Legal and contractual assistance** are also provided to the members of the association.
- **Regular information** through the monthly Members’ News bulletin and the updates brought to the [www.elra.info](http://www.elra.info) web site. Reports such Legal Issues on Web crawling or Market studies on LT in Europe are also shared with the members.
- Other reports are available to the members. Free online access to *Language Resources and Evaluation* (LRE) Journal, published by Springer, is provided to all ELRA institutional members.

Legal Support HelpDesk

Using, producing, sharing or distributing Language Resources can trigger legal questions related to Intellectual Property Rights (IPR) management which are not always easy to sort out. For nearly 20 years now, ELRA has established close co-operation with legal experts to clear such IPR issues, to design licensing schemas and draft licenses, but also to provide assistance on any contractual or legal matter that may arise during the Language Resources life cycle, including acquisition, production, sharing, or distribution phases.

With this Helpdesk service fully dedicated to IPR issues, we are extending our legal support to the whole Human Language Community. This Helpdesk provides services similar to those offered by the META-SHARE network.

Please contact us by sending a message to: elra-ipr-helpdesk@elra.info.
**PROJECTS**

**PRODUCTION PROJECTS**

ELDA is involved in a number of Language Resources production projects towards the production of annotated data. Production projects cover multiple languages and/or modalities. For the languages, ELDA can rely on a network of trusted partners worldwide to provide support for many languages, including less-spoken languages.

Whether commissioned by private customers or public institutions such as universities or research centers involved in research projects, the main objective of the corpora produced by ELDA is always to train general NLP systems, such as Machine Translation engine, Speech processing system, or very specific systems such as Automatic subtitling system for deaf people. Some production projects are dedicated to supporting the detection of hate speech online.

Contact us @ info@elda.org if you need to produce LRs.

- Building a multilingual conversational telephone speech corpus
- Rosetta Project
- Tamasheq Project
- POS-tagged Corpus in French and Spanish
- Audio Data Annotation for Speaker Identification
- Building a Speaker Identification Corpus for French
- Improve a conversational system
- Production of corpora for MT system
- Tweet Annotation for Hate speech detection

**EUROPEAN INITIATIVES & PROJECTS**

ELDA is involved in a number of European initiatives and projects pertaining to the domain of Language Resources.

The **ELRC initiative** is dedicated to the collection of language resources in all the EU languages (plus Icelandic and Norwegian) to improve eTranslation, the EC Machine Translation Platform; primarily for public services in Europe, extended to SMEs.

The **ELG initiative** objective is to address the fragmentation in European LT business and research by establishing the European Language Grid as the primary platform for Language Technology in Europe (data and technology).

The **MAPA project** aims at developing a fully deployable multilingual anonymisation toolkit based on Named-Entity Recognition (NER) applicable to all 24 EU official languages in the medical and legal domains.

- Connecting Europe Facility Initiatives
  - ELRC (European Language Resources coordination): LR Collection, Helpdesk, Legal Expertise
  - ELG (European Language Grid) LR/LT Platform, metadata
  - MAPA Multilingual Anonymisation toolkit
- AtCo2 project aims at developing a unique platform allowing to collect, organize and pre-process air-traffic control (voice communication) data from air space.
- COVID-Mlia@Eval has been launched in June 2020 to improve Multilingual Information Access in the specific context of the COVID-19 pandemic.
DISSEMINATION

ELRA’s main mission is to make Language Resources (LRs) for Human Language Technologies (HLT) available to the community at large. To achieve this goal, ELRA carries out a wide variety of activities around LRs, including Information Dissemination on HLT, which are described in this section.

LANGUAGE RESOURCES AND EVALUATION JOURNAL

The LRE Journal, the official ELRA journal published by Springer, is the first publication devoted to the acquisition, creation, annotation, and use of LRs, together with methods for evaluation of resources, technologies, and applications.

The LRE Journal, published by Springer, is the first publication devoted to the acquisition, creation, annotation, and use of LRs, together with methods for evaluation of resources, technologies, and applications. The ELRA members are granted complimentary access to the journal through the society on the condition that they subscribe to the publisher’s table-of-contents alert service.

In 2020, the following issues have been published. All the regular issues are co-edited by Nicoletta Calzolari and Nancy Ide:
- Volume 54, Issue 1, March 2020, Regular Issue
- Volume 54, Issue 2, June 2020, Regular Issue
- Volume 54, Issue 3, September 2020, Regular Issue
- Volume 54, Issue 4, December 2020, Regular Issue

https://www.springer.com/journal/10579

SPECIAL INTEREST GROUPS

http://www.elra.info/en/sig/

ELRA is actively involved in the following Special Interest Groups on the under-resources languages on the one hand and on spoken language translation on the other hand.

ELRA is also contemplating setting up a SIG on Ethics and Privacy.

SIGUL

Created in April 2017, SIGUL is a joint Special Interest Group of the European Language Resources Association (ELRA) and of the International Speech Communication Association (ISCA).

SIGUL intends to bring together a number of professionals involved in the development of language resources and technologies for under-resourced languages. Its main objective is to build a community that not only supports linguistic diversity through technology and ICT but also commits to increase the lesser-resourced languages (regional, minority, or endangered) chances to survive the digital world through language and speech technology.

http://www.elra.info/en/sig/sigul/

SIGSLT

Setup in 2020 by ACL, ELRA and ISCA, the Special Interest Group on Spoken Language Translation (SIGSLT) shall promote interest in the research area of spoken language translation including simultaneous translation and interpretation, speech dubbing, speech-to-text translation, speech-to-speech translation, cross-lingual communication including paralinguistic, emotional or multimodal information and related areas. The SIG will also provide ACL, ELRA and ISCA members with a special interest in spoken language translation and its related areas with a means of exchanging news of recent research developments and other matters of interest in spoken language translation.

https://bit.ly/3qWrtoz
LREC 2022, 20-25 MAY 2022

@LREC2022

The 13th international conference on Language Resources and Evaluation (LREC) will be organized in 2022 by ELRA with the support of international associations and institutions. LREC 2022 will take place at the Palais du Pharo, in Marseille (France).

Due to the COVID-19 pandemic, the 12th edition of LREC, LREC 2020, had to be cancelled. Despite this situation, the LREC 2020 Proceedings have been produced and are available online @ http://www.lrec-conf.org/proceedings/lrec2020/index.html

LREC, THE LANGUAGE RESOURCES AND EVALUATION CONFERENCE

The LREC Conference has become a major event in the field of language engineering, and constitutes a milestone in the life of Human Language Technologies (HLT). It is organized by ELRA biennially since 1998 with the support of institutions and organizations involved in HLT, and brings together an increasing large number of participants working and interested in HLT.

A UNIQUE FORUM

The Language Resources and Evaluation Conference is an international scientific event which aims at providing an overview of the state of the art, exploring new R&D directions and emerging trends, exchanging information regarding Language Resources and their applications, carrying out the evaluation of methodologies and tools, on-going and planned activities, industrial uses and needs, requirements coming from the e-society, with respect to both policy issues and technological and organisational ones.

LREC provides a unique forum for researchers, industrial players and funding agencies from across a wide spectrum of areas to discuss problems and opportunities, find new synergies and promote initiatives for international cooperation in support of investigations in language sciences, progress in language technologies and development of corresponding products, services, applications, and standards.

In 20 years LREC which is organized every other year has become the major event on Language Resources and Evaluation for Human Language Technologies. The conference programme is organised around parallel oral and poster sessions during the main conference (3 days) and workshops and tutorials (2 days before and 1 day after the main conference). Since 1998, the LREC conference has been organized every other year with an increasing success.

LREC 2006 Genoa
800 participants

LREC 2004 Lisbon
950 participants
LT4ALL, 4-6 December 2019
https://lt4all.elra.info/en/

The International Conference Language Technologies for All (LT4All): Enabling Diversity and Multilingualism Worldwide conference organized as part of the UNESCO International Year of Indigenous languages 2019 (IYIL2019) took place on December 4-6, 2019 at the UNESCO Headquarters in Paris. The International Conference was organized by UNESCO, the Government of the Khanty-Mansi Autonomous Area and ELRA, with its SIG on Under-resourced Languages (SIGUL), in partnership with the UNESCO IFAP and the Interregional Library Cooperation Centre and supported by numerous industrial sponsors.

MOTTO & CONTEXT

Everyone should have the possibility to get access to workable Language Technologies in their native languages, including indigenous languages.

Language Technologies (LT) have been incubating in research laboratories during half a century and are now widely spreading through numerous applications in many different areas.

The situation however is very different across the 7,500+ languages spoken over the world. Less than 2% of the languages have some LT available with various levels of quality. The remaining 98%, referred to as “under-resourced”, are not-supported. This creates a digital divide, and places those languages in danger of digital extinction, if not complete extinction.

https://lt4all.elra.info/proceedings/lt4all2019/

PROGRAMME + SPONSORS

The 3-day conference programme consisted in keynote talks, oral and poster presentations, panel discussions as well as reports. During all these sessions, systems and innovative applications were showcased and experiences gained in the deployment of technologies in promoting linguistic diversity and multilingualism put forward. The conference gathered UNESCO Member States, international bodies, regional governments and administrations, academia, language technology researchers, linguists, industry, indigenous peoples and language policy and decision makers from around the world. The conference, an invitation-only event, brought together more than 400 people from all over the world.

The Collection of Research Papers, with 100 papers, is available
